Now Fits The F-150 6.2L

One Part Number, More Applications!

AIRAID has exciting news for 2011 F-150 owners who opted for the 6.2L powerplant. Following the release of their newest intake system for the RAPTOR SVT 6.2L, Airaid announces the addition of the 2011 F-150 6.2L to their list of applications for this part number.

This new intake system features AIRAID's "Quick Fit" air-box and modular intake tube that is designed for unrestricted air flow to the engine. Breathing is done through a HUGE 1600 CFM washable and reusable Premium Air Filter that is available with either oiled or non-oiled filtration technology. All AIRAID filters are hand-poured using a special urethane blend that prevents cracking and shrinkage in the most extreme conditions.

This new system utilizes OE mounting points, installs in minutes with ordinary hand tools and comes with AIRAID's "No-Hassle" Warranty.
