10-11 Cadillac SRX 3.0L V6

Style and Performance!

The SRX is a beautifully designed vehicle for those enthusiasts who prefer the versatility of an SUV while maintaining the style and comfort synonymous with Cadillac. Although the SRX produces impressive numbers stock, Airaid decided to add their touch of style and performance with the release of their newest Quick Fit Intake System specially designed for the 3.0L V6.

This kit comes complete with a 1100-CFM hand-made premium air filter; Cold Air Dam with a beautiful matte black finish or optional Carbon Fiber Hydro Print combined it with a textured One-Piece Roto-molded intake tube and 100% stainless clamps. Testing on our in-house Mustang chassis dynamometer produced impressive gains of 7 horsepower and 7 ft-lbs of torque for the 3.0L over stock.

The system also comes with all the necessary Hardware, complete instructions and AIRAID's exclusive "No Hassle" Warranty.

Utilizes OE Mounting Clips
