2011 Chevy/GMC 6.6L LML

AIRAID announces the release of their newest MXP Series Intake System!

This new intake system features AIRAID's One-Piece Roto Molded Cold air-box with massive air inlets and modular intake tube that is designed for unrestricted air flow to the engine. Breathing is done through a HUGE 1700 CFM washable and reusable Premium Air Filter that is available with either SynthaFlow® composite or our newest SynthaMax® Non-Oiled filtration technology. All AIRAID filters are hand-poured using a special urethane blend that prevents cracking and shrinkage in the most extreme conditions. Dyno testing show increases of 19 Horsepower at 2,650 RPM and 34 lb./ft. of Torque at 2,000 RPM for these hard working trucks.

This new system includes all the necessary hardware, installs in minutes with ordinary hand tools and comes with AIRAID's "No-Hassle" Warranty.

MXP Features Include:

- Bolt On TORQUE & HORSEPOWER
- One-Piece Air Box with MASSIVE INLETS
- Increased FUEL EFFICIENCY
- Lowers EGT's
- EXCLUSIVE Oiled or Non-Oiled Filtration Technology

Your choice of filter media!
