## 2011 Ford Super Duty 6.7L

Ford's all new **6.7L Super Duty** diesel-powered engine is impressive. Producing 400 horsepower and 800 ft./lb. of torque stock, this power-house is built to run. **AIRAID**, continuing their mission to design the best performance products, announces the release of their newest **Cold Air Intake** system.

**AIRAID's** new intake system for the 2011 6.7L features a "**MXP**" **Series** one-piece rotational molded air-box and modular intake tube that is designed for unrestricted air flow to the engine. Breathing is done through a **HUGE 1600 CFM** washable and reusable Premium Air Filter that is available with either **SynthaFlow®** composite or our newest **SynthaMax®** Non-Oiled filtration technology. All **AIRAID** filters are hand-poured using a special urethane blend that prevents cracking and shrinkage in the most extreme conditions. Dyno testing show increases of **11 Horsepower** and **73 lb./ft. of Torque** for these hard working trucks.

This new system utilizes OE mounting points, installs in minutes with ordinary hand tools and comes with **AIRAID's "No-Hassle" Warranty**.
