2011 Jeep Grand Cherokee & Dodge Durango 3.6L & 5.7L

Profitable Power for Pentastars and Hemis!

AIRAID keeps the 2011 applications coming with the release of the Cold Air Dam (CAD) Intake System for the 2011 Jeep Grand Cherokee and Dodge Durango. One part number covers both the **Pentastar V-6 and Hemi-V-8** engine options for these vehicles, meaning more coverage with less inventory!

The CAD Intake System replaces the restrictive factory air box and its paper filter with Cold Air Dam Panels that keep hot engine compartment air away from the new air filter. Blade-style weatherstripping attaches to the top of the panels and seals against the hood, further blocking hot air. The CAD panels even re-use the OEM air scoop, ensuring a clean, cold air charge to the engine. The panels attach to factory mounting points for an easy installation using common hand tools.

The AIRAID system utilizes a massive 1100 cfm air filter, which attaches to the factory intake tube. The combination is worth an impressive **10 horsepower and 12 lb./ft. of torque** with the **Pentastar V-6**, and a hair-raising **16 horsepower and 14 lb./ft. of torque** with the **Hemi!** That's power your customers can feel right from the driver seat! Air filter options include AIRAID's traditional **SynthaFlow®** composite material or **SynthaMax®** non-oiled filtration technology. Both filters are washable and re-usable.

Like the rest of AIRAID's product line, the new CAD Intake System is Made in the USA and backed by our **"No Hassle"** warranty!

- Covers All Engine Options for Both Vehicles
- Easy 100% Bolt-On Installation
- Oiled and Non-Oiled Filters Available

Maximize your profits and update your database today!

In Stock, Ready to Ship!

oiled non-oiled
