## 2011 Polaris RZR 900 Cold Air Intake System

# SIDE X SIDE PERFORMANCE!

### AIRAID Snorkel System Delivers More Polaris Power

The UTV market has exploded in popularity, and just like all other enthusiasts, UTV owners are craving more power and better overall performance. AIRAID has teamed up with PJ Jones to introduce a new intake system for the 2011 Polaris Ranger RZR 900XP that delivers more horsepower with the added benefit of less required maintenance.

The newest AIRAID / PJ system begins by addressing a flaw in the factory air box. The factory design places the stock paper filter too close to the velocity stacks, which disrupts airflow and reduces power. The AIRAID / PJ system replaces the stock paper filter with an AIRAID **Power Curve** Air Filter. The filter has a concave shape to unshroud the factory velocity stacks and provides a substantial increase in airflow.

Good air filtration is critical to an off-road vehicle, as dust particles allowed into the engine can quickly score cylinder walls and rob engine power. The AIRAID **Power Curve** Air Filter offers excellent filtration by utilizing AIRAID's SynthaFlow® oiled composite media, which extends service intervals and increases ride time.

Going one step further, the Intake System allows the engine and the CVT transmission to draw air from up high, so there's no need to think twice before forging creek crossings or riding through mud holes. The specially molded snorkels attach to the air box and CVT transmission via large 3" diameter tubes and silicone couplers secured with stainless steel clamps. The snorkels themselves attach to the back of the factory rollcage, where they are out of the way give the RZR a more aggressive look and allow for more clean fresh air into the engine.

The AIRAID / PJ Intake System is completely bolt-on and comes with all of the hardware needed for installation along with detailed instructions. No additional tuning is needed; just bolt it on and ride!

- ◀ **Extended Service Intervals**
- ◀ **Increased Horsepower**
- ◀ **Washable & Reusable Filter**
- ◀ **"No-Hassle" Warranty**

| Part #  | Application                      | Carton Size           | Weight     | UPC          | Retail | Jobber |
|---------|----------------------------------|-----------------------|------------|--------------|--------|--------|
| 883-300 | 2011 Polaris RZR 900 Intake Kit  | 10 x 12 x 36          | 13.05 lbs. | 642046883003 |        |        |
| 850-352 | 2011 Polaris RZR 900 Filter only | 15.5 x 2.6875 x 11.25 | 2.17 lbs.  | 642046853525 |        |        |
